

Quick Installation

Intro

First, please make sure that you checked out the [Requirements](#) before you start with the installation.

To install CrossBox you need to have a valid and active license. If you don't have one, you can purchase it [here](#).

Here we will show you how to install CrossBox on **asingle server**. If you plan to install CrossBox on multiple servers, please head out to our [CrossBox Cluster documentation](#) to learn how you can unify communication across different servers and configurations.

Installation

Run the Command

SSH into your server and run the following command as *root*:

```
✓ sh <(curl https://cdn.crossbox.io/install.sh || wget -O - https://cdn.crossbox.io/install.sh)
```

Then proceed to log in with your CrossBox.io account:

```
root@cpanel1:~# sh <(curl https://cdn.crossbox.io/install.sh || wget -O - https://cdn.crossbox.io/install.sh)
% Total    % Received % Xferd  Average Speed   Time    Time     Time  Current
           %         %         Dload  Upload  Total   Spent    Left   Speed
100  521    100  521    0    0   2128      0  --:--:-- --:--:-- --:--:--   2135
% Total    % Received % Xferd  Average Speed   Time    Time     Time  Current
           %         %         Dload  Upload  Total   Spent    Left   Speed
100 2655k  100 2655k    0    0  9683k      0  --:--:-- --:--:-- --:--:--  9656k
Extracting... Please wait...
Welcome to
```

```
Setup
Please enter your crossbox.io credentials to begin installation
You can cancel this setup any time by pressing CTRL+C
x E-mail: █
```

After a successful login, you'll find the URL that you can now use to start the installation via your web browser.

The URL will be similar to the one shown below, but unique to your installation instance:

```
Verifying installer...
INFO: (Press CTRL+C to quit)

Installer OK!
```

Please visit the following URL via web browser to continue the installation:

<http://116.203.63.82:5000/api/v1/0/0/server/installer/run/RJAwR6Bpo08Gj3P>

Access the Installation via the Web Browser

Open your favorite web browser and paste the URL that you copied.

Configure

Almost everything is already pre-populated for you and the entire process takes about

ten minutes or often less, depending on your server's performance.

Detailed Help

If you're not sure what to enter in a certain field during the installation, just click on the "**Learn more**" link which is displayed beneath it:

☒ Use SSL

SSL is **recommended**. Cannot be changed after the installation. [Learn more.](#)

By clicking it, you'll be taken directly to that option's more[detailed documentation](#).

Start the Installation

After you click the "**Install**" button, CrossBox will start setting everything up. You can track the progress in real-time as shown below:
